English for  
Academic Purposes

**Tal Levy**  
**2024**

Does one size fit all?

Isn't this our real  
situation in our  
classrooms?

This is the most we  
can do when teaching  
all students with the  
same curriculum.

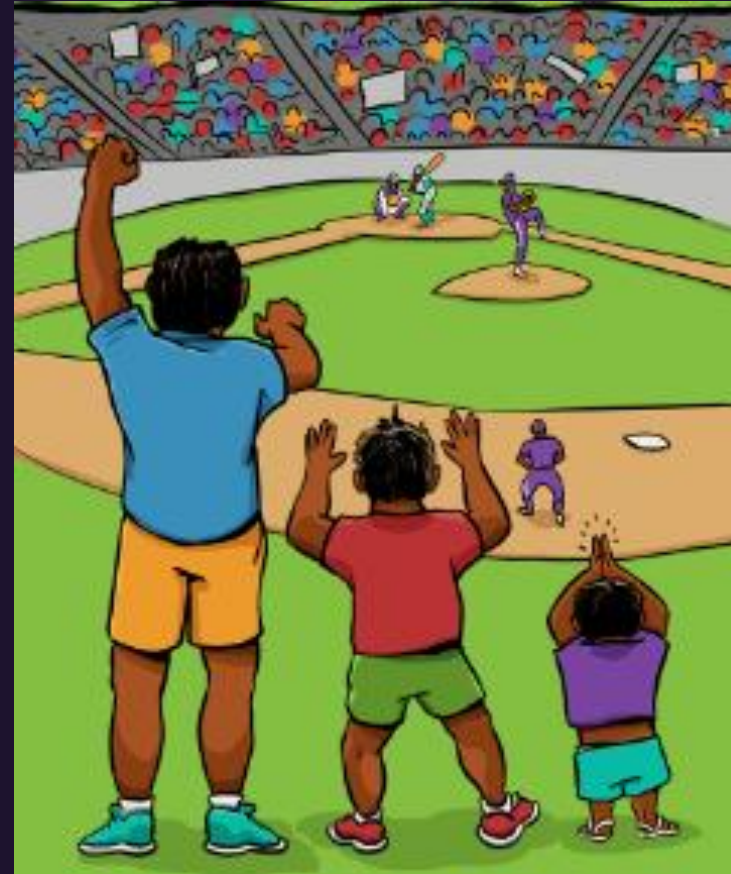

So how do we get  
here?

Or even better, here?

In a quest to find  
a solution,  
I was lucky to  
come across

learning  
efficiency

👤 Your answer act

I have a friend which live in london.

💡 Worth reading

- 'Who' is generally used for people, and 'which' is used for objects and animals.
- In present simple, if the subject of the sentence is: he, she, or it, we must use the 3rd person form. For almost all verbs, this is done by adding 's'. Here, you need to use 'lives'.
- When you write the name of a person or a geographical entity (country, city, river, mountain etc), you always capitalize the first letter: 'I met John/Paul/Lisa last week'; 'I have been to London/France many times'. You usually do not capitalize the word 'the' if it comes before the name: 'I saw the Amazon river'.
